PROJECTS

Personal Portfolio Website
- Developed a fully responsive personal portfolio website using HTML, CSS, and JavaScript.
- The portfolio is categorized into sections such as Home, Experience, Education, Projects, Skills, Contact, and About me.
- We can find the details related to that particular category by clicking on that particular category.

Stock Management System

- Developed a web-based stock management system using Java, HTM, CSS, JavaScript, JDBC, JSP, Servlets and MySQL.
- The main objective of the project is to manage a stock of an organization, and take care of sales and purchase of products.
- This project includes various features like add, edit, view and delete stock-management related things in the system database.
- This application is more effective for stock data management, the data is more secured as admin can only access the database.
- To maintain customer and owner relationship discount option is also added.

Employee File Sharing System

- Developed a document sharing system for efficient sharing of documents through cloud storage using Java, HTML, CSS, JavaScript, JQuery, and MySQL.
- It consists auto time-based deletion option to optimize the storage.
- Fine grained access control through OTP for deletion and downloading.
- It contains authentication module to reduce the unauthorized access.
- For OTP generation random function used in this system.

Technical SKILLS

HTML5 | CSS3 | JavaScript | TypeScript | Bootstrap | React JS | Java | Node JS | Express JS | JDBC | JSP | Servlets | MySQL | MongoDB | GitHub | DataStructures and Algorithms.

Professional Skills

- Typing Speed: 70 WPM.
- Excellent verbal and written communication skills.
- Strong problem-solving and logical skills.
- Strong debugging and analytical skills.
- Active listener.
